WORK EXPERIENCE

AmaliTech - Kumasi, Ashanti region, Ghana Software Engineer Intern - Engineered the backend for a mentor-mentee matching platform using FastAPI and Python, with JWT authentication for secure session management. - Worked in a cross-functional group of 5 tech professionals from different engineering fields to develop a full-stack working MVP.	Aug 2026 - Sep 2026
Ashesi Center for Entrepreneurship - Berekuso, Eastern Region, Ghana Software Engineer - Applied Innovation Lab - Developed an offline-first farm management software for Koranco Farms to enable uninterrupted field operations in low-connectivity environments. - Designed custom authentication and role-based authorization pipelines with FastAPI and PostgreSQL. - Built a website for Koranco Farms to improve SEO and lure in customers and visitors to contact or visit the farm.	Jul 2026 - Sep 2026
Ashesi University - Berekuso, Eastern Region, Ghana Student Library Assistant Assisted 30+ patrons with technical difficulties regarding printing, scanning, and database navigation, translating complex technical processes into plain English.	Feb 2026 - May 2026

PROJECT AND RESEARCH

SessionBook Developer - Engineered an async FastAPI backend exposing REST endpoints integrated with an AI voice agent (AssemblyAI) to check availability and book appointments in real time. - Modeled and migrated a PostgreSQL schema with SQLAlchemy 2.0 and Alembic, handling timezone-aware scheduling across UTC storage and local-time display.	Sep 2026 - Sep 2026
Syncareer Product developer - Leveraged AI-assisted development tools to rapidly build a full-stack working MVP (https://syncareer.me/). - Delivered a pitch to potential investors for Syncareer, securing seed funding to develop the platform further.	Jan 2026 - May 2026

CO-CURRICULAR ACTIVITIES

Ashesi University , IEEE Student Branch Ambassador Coached students over multiple weeks, successfully advancing them in competitions and hackathons.	Sep 2026 - Dec 2026
DataCamp - Ashesi, DataCamp Donates Program Coordinator - Coordinated learner access to DataCamp's AI and data science learning platform through the Donates Program. - Supported 35+ students and community learners in accessing technical upskilling resources in data science, AI, and programming.	Nov 2025 - Nov 2026

SKILLS

- Languages: Python, Java, JavaScript, SQL, R
- Backend: FastAPI, REST APIs, PostgreSQL, MongoDB
- Data/ML: Pandas, Data Cleaning, Supervised ML
- Tools: Github, Git, Pytest, Shell Scripting, Pydantic
